Neural Network

The neural network below contains an input layer, one hidden layer, and an output layer.

The bias for h_0 and h_1 is 0.35 and the bias for o_0 and o_1 is 0.6.

We will give the inputs 0.05 and 0.10 to i_0 and i_1 respectively, and expect outputs 0.01 and 0.99 from outputs o_0 and o_1 respectively.

1. Show that the activation value at h_0 is 0.3825.
2. Find the activation values for the output nodes.
3. Calculate the sum of the squares of the errors.
